DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Horikoshi et al [20030044710] in view of Nakamura et al [20030049553] and Sato et al [20040043318]. Horikoshi teaches a toner for flash fusing of the developed image with a toner having two infrared absorbent agents. The agents can be from cyanine-based and aminium-based note [0016] and can be used together [0036]. The amounts of both vary over a large range however the total amount of IR agents is within the range of applicants' note [0072]. Wax is taught as a releasing agent note [0084]. Horiloshi et al fails to teach the use of two release agents or a mix of binder resins. Nakamura et al teaches the use of two binder resins and the use of an IR agents in a toner particle [0047] and Sato et al uses two waxes with two binder resins in a toner particle. It would be obvious to one of ordinary skill in the art at the time of applicants' invention with a reasonable expectation of success to use the advantage of two waxes and binders with

two IR absorbent agents to control the physical properties of a toner used in a flash fixing technique.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-21 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 15 and 20 of copending Application No. 10/697236. Although the conflicting claims are not identical, they are not patentably distinct from each other because both teach the use of two IR absorbent agents in a toner composition.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
